

Management Software Group

“Conferences series” 2009:
“Jornada”: ERP: Tendencies.

Successful debate about the evolution of ERP tools.

Last February 5th, the “Management Software Group of the La Salle Graduate Student Association”- **Universitat Ramon Llull**”, hosted a “Jornada” about ERP tools, its tendencies and evolution and its further influences, an event of the 2009 Conferences series.

With a great participation, the event has been taken in charge by **Luis Carrasco from Delphin Project Hunting and the Management Software Group of the Graduate Student Association.**

Software Management Group

Walter Rossi handled the beginning of the conference, representing the **Software Management Group**, and giving the opportunity to know more about its mandate and enhancing the importance of Continuous Education, Professional Development and the Networking witch mainly supports these initiatives.

Later, aiming to achieve the objective of sharing common interests about information systems, the activities realized by the group during the year 2008 were mentioned, as well as the ones that are scheduled for the year 2009.

“We, the organization, consider that continuous education, professional development are essentials, and furthermore the Networking, which we hope that it will be an appropriate channel for the members.”

Finally, we invite all assistants to give their opinions or suggestions, writing us to:

Delphin Project Hunting

On the other hand, **Luis Carrasco, Delphin Project Hunting Manager**, introduced for his debate the new tendencies, which gowned up to a higher accuracy level, are brought in the business management applications. The conference presented the tendencies trough several topics as:

Dynamic user Interface, Paradigms of the Web 2.0 (Facebook, Google Maps, YouTube, Wikipedia, Etc.), Financials Solutions in TIC in its actual context, Systems settings blow up and maintenance reduction, Integration of BPM tools and Architectures focused to SOA Services.

- Development Platforms upon demand, SaaS and Cloud Computing, Free Software.

These tendencies were also put forward from the perspective impact following these 3 levels:

- User
- Total Property Cost Price - TCO
- Relation and Business Negotiation Models.

Finally, the conference ended with a debate between the lecturer and the audience that showed up the success of the event.
