MÁSTERS Y POSTGRADOS

MASTER OF SCIENCE IN PROJECT MANAGEMENT

The main goal of the Master of Science in Project Management is to provide the students with an **advanced multidisciplinary training in Project Management** which is **constantly updated** considering the current landscape of value delivery rooted on people, processes, and commercial perspectives, employing a **combination of professional and academic approaches**.

The **Program provides the necessary skills to lead and manage projects**, as well as to develop the knowledge and skills to **pilot the management of an organization** and its processes. Additionally, the Program caters the **skills to face the challenges of VUCA environments** (Volatile, Uncertain, Complex and Ambiguous) following a holistic, integrated and systemic approach.

The Master of Science in Project Management is aimed towards academics as well as to professionals whose positions demand **coordination and leadership skills**, who are currently in charge of managing projects or will be in a future.

This Program supports the fundamental values of the Project Management Institute (PMI) related to the management of projects as a critical aptitude with a positive influence in the results of the organization and overall society, responsibility and ethical behavior, volunteering, diversity, inclusiveness, community and compromise.

ENTRY PROFILE

Professionals participating in projects, Professionals responsible for projects and university graduates. Depending on age and experience, the degree is taken during the week or during the weekend.

DEGREE

Master of Science in Project Management

OBJECTIVES

1

Plan, manage, execute, and evaluate all kinds of projects within different scenarios according to the international standards established by the PMI.

2

Get to know the different approaches, methodologies (**Agile, Scrum, Lean, Waterfall...**) and techniques for each of the project's phases: **Initiation, planning, execution, monitoring, and closure**.

3

Understand and analyze **requirements and restrictions of the project in a critical way**, adapting them to the value chain and considering factors such as **the scope, cost, schedule, resources, acquisitions, quality, risk, and stakeholders**.

4

Develop **managerial skills and techniques** to boost the capacity of adaptation to the requirements of the role of Project Manager and **motivation of its teams**.

5

Learn about the technical aspects of **contracts and project administration to promote, protect and care for relationships** with clients and suppliers.

CAREER OPPORTUNITIES

- Project Manager:** A professional prepared to direct projects of any size or sector.
- Program Manager:** A professional with knowledge for the direction, planning and development of programs.
- Portfolio Manager:** A professional trained to manage project portfolios.

WHY STUDY THIS MASTER?

As a **qualified Project Manager by La Salle-URL** you will be a highly trained professional in Project Management and will become part of **the largest PM networking in Europe, with over 4.000 Project Managers** trained in our classrooms.

La Salle-URL is the first and **only University in Spain accredited by the Global Accreditation Center of the PMI**, with which you will obtain **1 year of experience among the requirements to obtain the PMP certification** of the PMI upon finishing the Master's.

You will develop Project Management skills with La Salle's hallmark: **Innovation, entrepreneurship, creativity, reflection, leadership, motivation, international vision, capacity for influencing, complex decision-making situations, team spirit development, political and cultural knowledge** for the management of international project along with **multicultural teams, negotiation skills**, and a good command of **technology**.

This Master has a faculty made up of leading professionals in the sector: **Alfonso Bucero, David Austin Hillson (The Risk Doctor)** and **Xavier Albaladejo (Agile Coach)**, among others.

ACCREDITATIONS: AQU, GAC, PMI

ACADEMIC PROGRAM

SEMESTER I

Project Management

The **basic principles of Project Management** are shown, defining a **transversal and common framework** for any project and/or sector. The course focuses on the areas of range, deadlines and costs, which are the main axes of any project.

Business Management

Establishing the **basis of knowledge that a professional must have** about Project Management, studying the **different functional disciplines** in order to observe **how they affect the changes in the corporate environment**, defining the keys to success of organizations.

Cost Management and Investment Analysis

Providing the students with the **necessary aptitudes for budgeting and decision making in investment projects**, based on economic, financial and profitable feasibility criteria.

Integrated Project Management

Once the framework to be used in the Project Management has been defined and the **areas of the Triple Constraint** have been worked on, the student gets to know in detail other **management processes, often ignored**, that also contribute decisively to the success of the project.

Management Skills (Semesters I and II)

Identifies the inherent priorities of the project manager role, putting into practice an **individual ongoing improvement** process based on the development of key competences for attaining the objectives of the project, quality of work and relationships with clients.

International Projects

Given the need to **manage projects in a variety of cultural and economic environments**, the students are prepared to be able to manage the complexities that arise when **working in an international context: Management of virtual teams, contracting processes** according to international law or the **risks associated with logistics**, among others.

SEMESTER II

Project Management in the Company

Provides a **business and strategic vision** to align up the objectives of the company with the **implementation and development of a project** or group of projects, assessing the impact of results.

Project Management Frameworks

Includes the **main methodology** of Project Management from the focus of **change management** so as to obtain a global vision about its applicability. **The student will have free access to the online PMP® (Project Management Professional) Certification course to access the exam for obtaining the PMP® o CAPM® of the PMI.**

Master's Thesis

Made to **cement all the developed aptitudes** throughout the Master's. The student analyzes, arguments and presents a **case on the area of Project Management guided by a mentor.**

OPTIONS *

Concepts of Innovation in the Company

Presents the mechanisms to organize the innovation process in a company, **business models and the necessary aptitudes to endorse innovation projects.**

Agile Project Management

Focused on **Agile Project Management methods**, application environments and the best-known techniques (**Scrum, Kanban, Lean...**), highlighting **customer's needs, adaptation to change and interaction between people** to get the most out of teams and results.

Lean Project Management

Provides a **global vision on the principles of Lean to apply the system in different areas.** Introducing both the classical and most recent tools.

Pharma - Biotech Projects

Analyzing the R&D environment in which these projects are developed along with the **application of Project Management techniques** exposed in the Master.

Digital Transformation Projects

With the objective of **identifying and taking advantage of new digital opportunities for the development of projects**, which, altogether, will form the digital transformation plan of a company.

Construction Projects

Goes through the **key success factors in the management of the different construction projects**, analyzing the strengths that companies in the sector must possess in order to compete in the current context.

Start-up Projects

Focuses on the **entrepreneurial process and starting a new business project**, where ideas become business models that will be tested **through interactions with potential customers, partners, and suppliers.**

*We will ensure a quality teaching experience for the student in an elective subject as long as there is a minimum number of students enrolled. If an optional subject does not reach that minimum participation of the students, it will not open.

FACULTY

The **MUDP** faculty team is made up of relevant active professionals and prestigious academics.

PROGRAM DIRECTOR OF MASTER OF SCIENCE IN PROJECT MANAGEMENT FULL TIME: **ANTONIO CASTRO**

PROGRAM COORDINATION OF MASTER OF SCIENCE IN PROJECT MANAGEMENT FULL TIME: **LUÍS BALLÓ & JORDI DALMAU**

ON-SITE METHODOLOGY

You will receive an **active and practical training that will stand you out** as a **Project Manager** with high skills and a deep knowledge.

With this goal, we use **different learning methods** that promote the development of **group projects**, the exchange of experiences, the resolution of challenges and the **attendance in workshops and seminars**. This innovative methodology will allow you to:

- **Develop leadership and cooperative skills.**
- **Increase your ability to adapt to new situations.**
- **Develop teamwork skills to achieve objectives** in complex and under pressure situations.
- **Endorse your capacity for analysis and decision-making** in unforeseen situations, under pressure and outside your comfort zone.
- **Develop planning skills** as a critical process for achieving the expected results.
- **Learn to optimally manage time limitation** and resources in difficult and changing situations.
- **Use tools and Project Management techniques with agile methods (Scrum, Kanban, XP and DevOps)**, which are **strongly oriented to provide maximum value to the business**, reducing the delivery time to the market of new products and quickly adapting to a very competitive environment.

ONLINE METHODOLOGY

Our **own online methodology** is based on **situational learning and self-study**. With situational learning we teach you, through challenges, **how to approach real problems and situations of the company** with which the new knowledge acquired can be shown. With **self-directed learning**, you decide how to advance your training based on your previous experience.

The course is based on the **constructivist method**, we adapt to your previous knowledge so that you make the most out of your training's dedication.

With our online methodology **you will always be attended by coordinators and mentors, expert teachers** in their subject, who are active and advise you how to **solve challenges and keep going with your training**.

ADMISSION PROCESS

1

SUBMIT YOUR DOCUMENTATION

- Registration form
- University Degree accreditation
- Updated resume
- Copy of ID or Passport

2

INTERVIEWING WITH YOUR PROGRAM COORDINATOR

After studying the documentation, you will interview with the Program coordinator in order to get to know you, assess your professional profile and ensure a diverse group of candidates.

3

BOOK YOUR PLACE

When the Admissions Committee validates your profile, we will communicate the result of your admission process and we will inform you of the payment conditions.

La Salle Campus Barcelona is part of the **international network of Lasallian Universities**, an institution with **300 years of history**, made up of over **1,600 educational centers** present in **77 countries**.
